

Датчик давления *cerabar M PMP 46* *cerabar M PMP 48*

Overload resistant pressure transmitter with
с внешней диафрагмой и аналоговым
или Smart встроенным преобразователем
electronics

Hello Mr. Andreas,

Thank you for your e-mail!

Method is the following:
-open/export a PDF file (Adobe Acrobat format)
in CorelDraw 9/10,
-save it as a CDR file (CorelDraw format),
-work/translate it in CorelDraw,
-print it in PDF via Distiller, and
-after all, you have the same/original file in PDF
that includes yours correcting.

Kind regards
Vladimir Khromov

Subject: Writing on apdf file

Hallo Wladimir,

You had told me on your last visit a trick you
had for writing on a pdf file.
I have forgotten it and need the information
for ROK Khofol.
Can you please tell me again?

best regards

Holger Andreas

Features and Benefits

- Accuracy
 - Linearity deviation lower than 0.3% of set span
 - Adjustable measuring range with TD 10:1
 - Long-term stability better than 0.1%
- Piezoresistive metal sensor for measuring ranges up to 400 bar (6000 psi).
 - Electronics
 - Analogue: cost effective version with short response time especially for fast processes
 - Smart: intelligent with flexible operating procedures via HART protocol
- Housing
 - With its stainless steel housing and no dead volume, the Cerabar M fulfils all the special hygienic requirements of the food and pharmaceutical industries.
- Process connections
 - Changing the material of the wetted parts by simple replacement of the sensor module with the diaphragm seal
